

BRIGHT HARD DETERGENT FOR DISHWASHING MACHINE

BRIGHT HARD it is a light yellow liquid detergent formulated for dishwashing machines. BRIGHT HARD is suitable to use with hard water and very dirty dishes. BRIGHT HARD is a caustic product with a very high sequestration power that does not contain phosphates, the pH solution @ 1% is >12 and it produces very little foam.

BRIGHT HARD can be used in any kind of dishwashing machine (tunnel, cabinet, etc.) and any kind of dishes and vessels, glassware, pottery. BRIGHT HARD must not be used on aluminium, galvanized materials and copper alloys.

INSTRUCTIONS FOR USE

Generally HARD BRIGHT is mixed 1-5 grams per litre, depending on intensity of dirt and hardness of water.

Mix 2-3 grams of BRIGHT HARD with 1 litre of soft water*

Mix 3-4 grams of BRIGHT HARD with 1 litre of medium water*

Mix 5-7 grams of BRIGHT HARD with 1 litre of hard water*

Washing should be followed by rinsing, preferably with demineralized water. It is strongly recommended to add an appropriate rinse aid like CLEANAID to the rinsing water.
